

## LIGHT SPACE

"It's hard to believe that this light-filled contemporary living space was once three pokey rooms without a hint of connection. A small kitchen, lounge and dining room have been fused into one large open-plan area with a seamless sense of flow, space and functionality. All services were moved to the new kitchen position in the old dining room. Replacing the old dining room window with a new bifold window had an immediate dramatic impact on the aesthetics, allowing light to pour in and open up the room. For the cabinet doors and panels, a mix of timber veneer and polyurethane brings colour and character. The rich medley of tones and textures is brought to life by the LED lighting beneath the overhead cabinets. Granite across the benchtops and splashback complements everything, including the contemporary Colour Back glass splashback. A hidden walk-in larder complete with shelving and a benchtop area means the owners can keep any clutter behind closed doors. Modern finishes, streamlined appliances and tiled flooring keep the whole space flowing effortlessly. Energy-efficient LED downlights complete the effect. The owners got their wish – a light and spacious design that lets them enjoy cooking, entertaining and living in an open format."

**Designer: Michael Attard for Attard's Kitchen & Cabinetry**

*We love the overwhelming sense of space and light.*
