A thoughtfully designed and well-equipped kitchen is the central area of this appealing new home

BELOW Fixed, symmetrical lines and great balance provide a clean visual line with a crisp, streamlined finish.

MICHAEL Attard has been designing and manufacturing kitchens for Sydneysiders for more than 20 years — and that depth of experience and knowledge shines through in this latest kitchen project.

The kitchen of this new house is the central and most used part of the home and so it required an effective design and quality finishes befitting its important position.

Copious amounts of storage space and an expansive island area for food preparation, serving meals or as a casual dining area were all part of the owners' requirements and expectations for this particular kitchen. A wide selection of quality mod cons was also on the wish list.

A coffee machine is a very popular and well-used feature with the owners able to

enjoy a strong short black or a leisurely latte at any time of the day. A warming drawer is a thoughtful and useful addition to this kitchen, too.

At the same time, the owners wanted clean lines and to avoid an overall look that was cluttered and 'busy'. So, where possible, symmetrical areas were created and fixed, central alignment points used to give a streamlined effect.

Attard's Cabinetry's kitchen designs are renowned for being practical and functional while incorporating innovative ideas in storage solutions.

Years of industry experience matched with the very latest in kitchen design ideas work together in this new home to deliver a kitchen that ticks all the boxes for the delighted owners.
